

Q8 Antifreeze Extended Life Premixed

Premixed OAT-based engine coolant

Description

Q8 Antifreeze Extended Life Premixed is an engine coolant based on OAT technology (organic additive technology), providing freezing and corrosion protection. In today's combustion engines, the engine and cooling system need to be protected against corrosion and frost damage. Q8 Antifreeze Extended Life provides freezing and boiling protection, and is compatible with commonly used metals and elastomers while providing efficient heat transfer.

Applications

Q8 Antifreeze Extended Life Premixed is an all-round coolant, meeting industry standards such as British Standard BS 6580 and the French standard NF R 15-601.

Benefits

- Outstanding system metal corrosion protection.
- Outstanding compatibility with system rubber seals
- All seasons type engine coolant.
- Outstanding compatibility with car paint and finishes.
- Superb corrosion protection of coolant system metal compositions and solders.

Specifications, recommendations and approvals

AS	2108-2004	GB	29743-2013
ASTM	D 3306	SAE	J 1034
CUNA	NC 956-16	UNE	26-361-88/1
CUNA	NC 956-18 (Except RA)		

Properties

	Method	Unit	Typical
Colour	Visual	-	Blue-green
Freezing Protection 50-50%	D 1177	°C	-35

The figures above are not a specification. They are typical figures obtained within production tolerances.

Remarks

This type of engine coolant is recommended to be replaced after 2 years
