

Q8 Porta 125P

Process oil with optimum performance

Description

Q8 Porta 125P is an advanced process oil with optimum performance and a high oxidation and thermal stability. This light coloured oil has a low aromatic and nitrogen content and minimum evaporation losses when heated. Q8 Porta 125P improves the elasticity of the rubber components.

Applications

Q8 Porta 125P is used in rubber and ink industry. It is applied in softeners and extenders (rubber industry). Q8 Porta 125P is also recommended as anti-dust oil in the agriculture industry and carrier oil in the lubricants industry.

Benefits

- Reduction of product portfolio through extended lubricant applications
- Highly resistant to ageing
- Optimum thermal stability
- Low evaporation
