01

At Q8Oils, we pride ourselves on being the preferred oil manufacturer across many sectors, offering innovative lubricant solutions tailored to meet the unique needs of each industry.

About Q8Oils

Q8Oils: Your preferred business partner

- Present in more than 100 countries
- Q8Oils has positioned itself as the leading supplier of lubricants for large enterprises in the international market
- Own R&D laboratories and state-of-the-art blending plants
- We offer a unique supply solution for all applications in various sectors:

Automotive

Energy

Metalworking

General Industry

مؤسسة البترول الكويتية
Kuwait Petroleum Corporation

Part of a Strong Group

Q8Oils is a subsidiary of Kuwait Petroleum Corporation (KPC), which is ranked as one of the world's top ten energy conglomerates. KPC helps meet the world's vital oil and gas needs via diverse business activities which span all aspects of the hydrocarbon industry, from onshore and offshore exploration, to production and refining, petrochemicals, marine transportation and retailing.

Be your customers' most trusted lubricant supplier with Q8Oils – Your Partner in Quality!

At Q8Oils, quality and responsibility go hand-in-hand

As a member of ATIEL, (the Technical Association of the European Lubricants Industry), we contribute to shaping ACEA European engine oil specifications to ensure the highest level of lubricant excellence on the market.

ATIEL pioneered the establishment of SAIL, an independent testing institute, to guarantee the quality of engine oils claiming to meet ACEA specifications. SAIL monitors product quality closely by subjecting random oil samples to rigorous laboratory testing. You can demonstrate your adherence to industry rules as defined by the European Engine Lubricant Quality Management System (EELQMS) easily by joining SAIL via its user-friendly platform.

Meeting specifications is crucial

At Q8Oils, our research department tests lubricants for their compliance with the standards. Our products often exceed these standards. Our findings reveal that 50% of oil samples fall short of EELQMS requirements. These products of competitors oil samples claim but fail to meet ACEA specifications – and these specifications form the foundation for OEM approval! Failing to meet ACEA standards jeopardizes your compliance with OEM specifications and also puts at risk various OEM specifications for oils that fall short in ACEA-defined tests.

Meeting ACEA E8 standards requires rigorous testing:

Specification	Bench Test	Engine Test
ACEA E8	16	7

Count on Q8Oils for:

- **Fully Tested Formulations:** Our commitment to quality includes testing our products precisely to meet the industry standards set by ACEA, API and ZF.
- **Approved Technology:** We use OEM-approved technology to ensure reliability and performance.
- **Q8 Research Endorsement:** Q8 Research tests every product thoroughly to guarantee excellence.
- **Engine Protection:** Q8 products prevent sludge and engine damage, to keep your engines clean and running.
- **Oxidation Stability:** Q8 products offer great oxidation stability, resulting in longer drain intervals and fewer oil changes.
- **Environmentally Responsible:** Reduce your environmental footprint by increasing engine efficiency, thanks to Q8 products.
- **Fuel Efficiency:** Achieve improved fuel efficiency, and reduced emissions with products tested according to ACEA requirements for E4/E6/E7/E8/E9/E11.

Research & development

Our R&D department is an important part of our search for innovative products and strategies. Through our extensive and intensive research, we determine the future technical requirements of lubricants. This is how we continue to exceed the expectations of the industry and our customers.

In our modern blending plants, as well as in our research and technology centers, we create products that meet and exceed the highest performance requirements. And that at a competitive market price.

State-of-the-art production facilities in Belgium, Italy and various productions via local partners. This combined with our own research & technology centers.

Products that exceed the highest performance requirements. Approved by all major OEMs.

Custom product development based on customer challenges and needs.

Superior solution for lubrication needs.

Q8Oils PALub

More information on <https://www.Q8Oils.com/palub/>

Product Applications Lubricants represents the technical service division of Q8Oils. Our team comprises passionate experts with extensive knowledge in the sector. Don't hesitate to reach out to us for inquiries regarding product applications, specifications, safety requirements, and any other relevant information. We are here to assist you with enthusiasm and expertise.

Advise

Contact us for all your questions about our product range, new products, and market specifications.

Sales support

Our experts also support the sales team in visiting companies and distributors.

Marketing support

PALUB can provide support in the preparation of product datasheets, the development of brochures, translations (FR, NL, DE) and the creation of labels for large packaging.

Intermediary

PALUB can act as an intermediary between you and our R&D team.

Maintenance

We handle the maintenance of all tools provided through Q8Oils.

Training

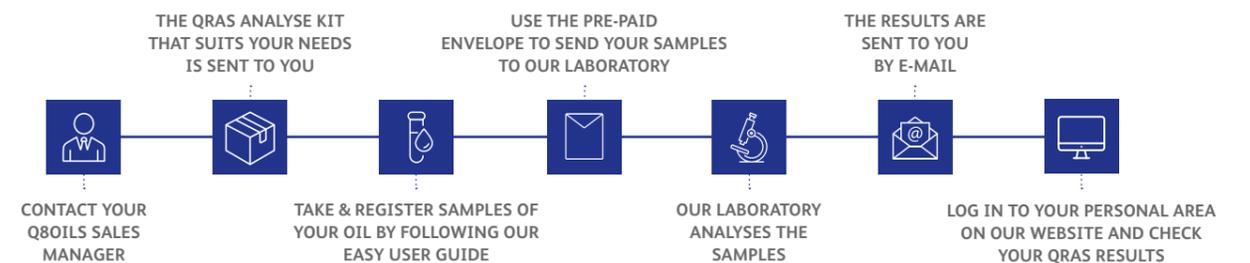

We organize training courses on new products and/or applications, as well as extended introduction sessions for newcomers to the oil market.

QRAS

Q8Oils Routine Analysis Service

Q8Oils understands that operating conditions vary significantly, and we are here to offer expert advice on selecting the most suitable oil for your specific application.

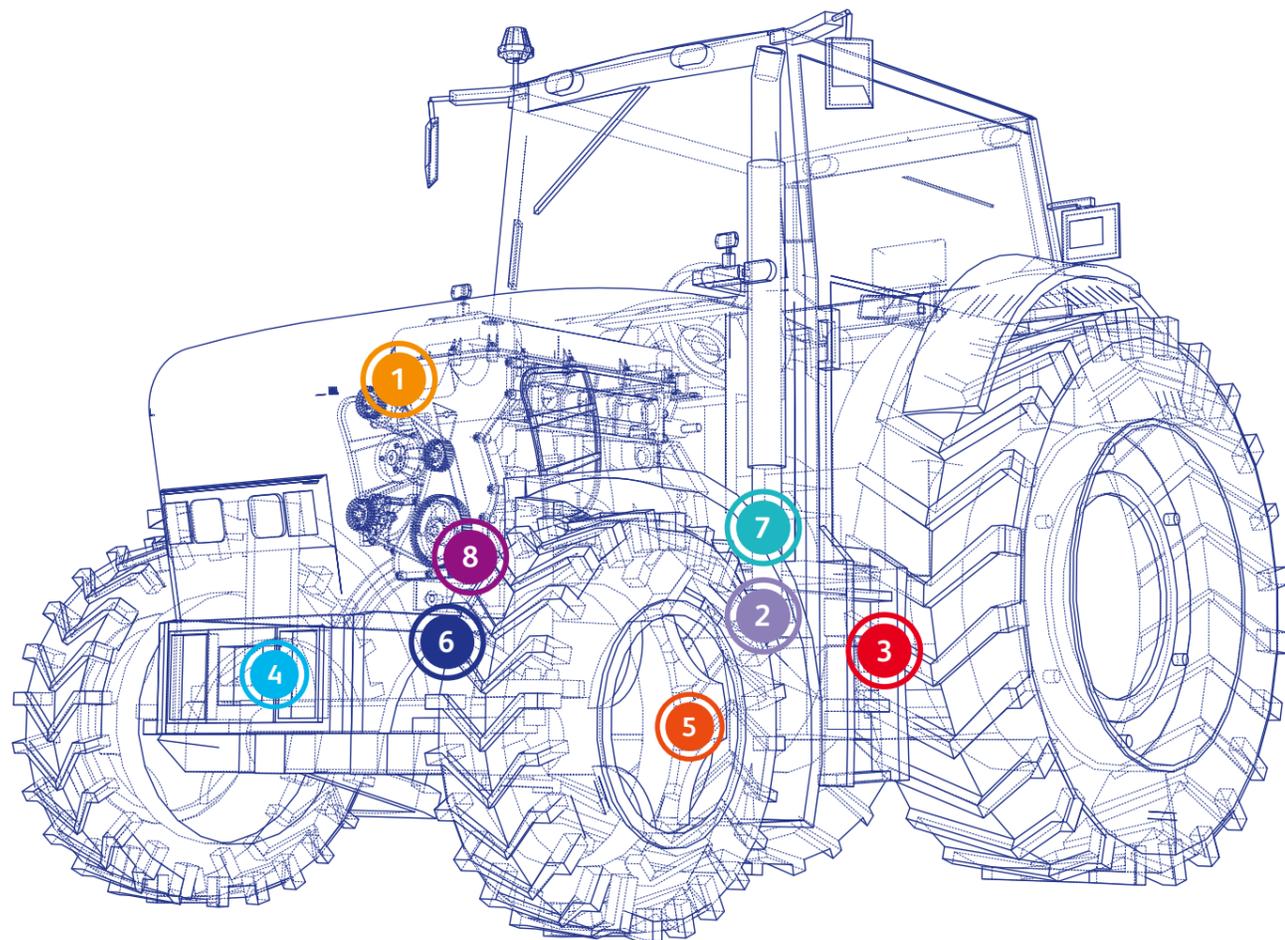

Through our Q8 Routine Analysis Service (QRAS), customers can extend the lifespan of their engines or machines, reduce operating costs, and optimize their lubrication program. Regular oil analyses help prevent potential severe damage or breakdowns by identifying issues and providing insights into the necessary actions to be taken and their urgency, as interpreted by our team of experts.

Benefits

- Access your results online anytime for your convenience.
- Get recommendations from our technical expert support team regarding your oil condition & engine wear.
- Receive an in-depth report encompassing all pertinent details, including historical data, oil sample analysis, machine condition, and more.

Q8Oils portfolio of Heavy Duty Engine Oils

offers a wide choice of qualities:

Fuel saving

The Q8 Terra range offers fuel savings of 0,5% up to 3,5% in on- and off-highway applications.

Low SAPS

The Q8 Terra range is based on low SAPS technology. This gives the required protection for after treatment system like DPf, EGR and SCR.

Durability and wear protection

The Q8 Terra range offers long drain and high oxidation stability and wear protection.

The portfolio of Q8 Terra UTTO products

offers durability, efficiency and an environmental

responsible choice.

Class leading Q8 Terra CVT UTTO's

The Q8 Terra CVT UTTO's offer the highest oxidation resistance, even at very high temperatures. Class leading viscosity retention is further improved and over 5 times better versus a market general UTTO.

Environmental Responsibility

The Q8 Terra range focuses on sustainability, offering products that reduce environmental impact by having a lower footprint or a strong handprint. Q8 Terra range is based on the highest quality base oils, including renewable and re-refined base oils. These re-refined base oils meet the same rigorous standards as virgin base oils, ensuring no compromise on quality. This aligns with modern agricultural practices that emphasize environmental stewardship.

Lower operational costs - Total cost of ownership (TCO)

It is important to set targets and check what the hourly maintenance cost is for repairs, replacement of parts, benchmark on failure frequency and cost of downtime for each piece of equipment in terms of lost production. Q8 Terra 4000 CVT LV offers long drain due to a best-in class viscosity retention and gives at the same time an extra fuel economy benefit up to 0,7 % or more.

Hydraulic Fluids

Product	Type	VI	Anti-wear Technology
Q8 Haydn 46	Mono-grade	100	Zinc
Q8 Heller 46	Multi-grade	> 150	Zinc

AGRICULTURAL APPLICATIONS

Q8Oils Sustainability

Our sustainability commitment 42

Our sustainability commitment

As lubricants play a vital role in keeping the world moving, it is crucial that they are produced responsibly. At Q8Oils, we are dedicated to leading the way in environmental responsibility. For years, we have been dedicated to minimising our environmental impact through sustainable practices, while also supporting our customers to reduce their footprint.

Minimising footprint

Lowering our negative environmental impact

Our goal is to minimise our footprint through product innovation on every component that impacts this footprint, such as relying on renewable energy sources, optimising production processes and using sustainable raw materials.

Product Carbon Footprint

The PCF-value represents the total amount of greenhouse gas emissions associated with the lubricant and is mentioned on every product sheet for full transparency.

Maximising handprint

Enhancing our positive environmental impact

At Q8Oils, we go beyond carbon neutrality. We actively contribute to the sustainability efforts of customers and partners. Our lubricants ensure energy efficiency and extended service life, helping other companies to reduce their carbon footprint.

Reduce friction

Reduce energy consumption

Increase equipment lifetime

Sustainability beyond our products

Shared value and social responsibility are rooted in our values.

We actively engage with the communities in the regions where we operate to foster environmental stewardship and human capital development. Our BeWell program promotes employee well-being through preventive medical check-ups, wellness campaigns, and physical and mental health training.

Partnerships are vital for advancing our Sustainable Development Goals (SDGs). We collaborate with our suppliers to develop sustainable packaging solutions and help to promote responsible industry practices through our partnership with the Union of the European Lubricants Industry (UEIL).

Did you know... we're also committed to sustainability through tree planting and initiatives like World Cleanup Day?

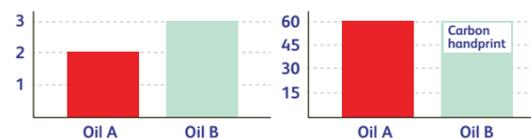

Scan to find out more about We Take Care

Why is PCF Important? (Product Carbon Footprint)

- Evaluation of the PCF includes evaluation of the use phase (= handprint/avoided emissions)
- The product carbon handprint describes the positive environmental impact of the product in use throughout its lifetime.
- Improved focus on the carbon handprint can identify opportunities to reduce the impact on the environment and drive change.

The carbon handprint are the avoided emissions in the use phase of lubricants

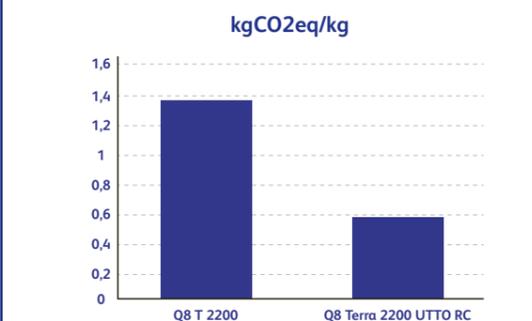

Conclusions

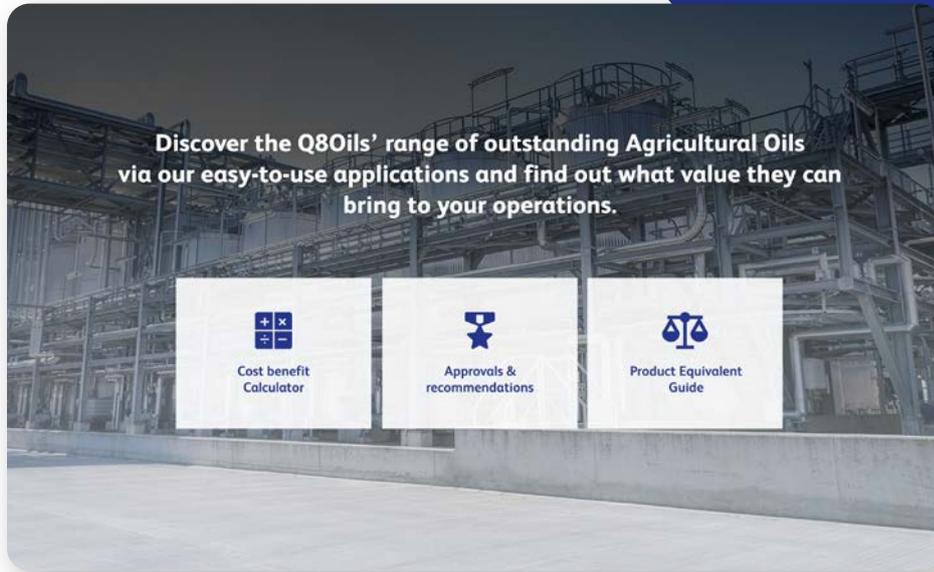

PCF evaluation (Cradle-to-Gate) indicates higher footprint value for product B. After evaluating the use phase, after 10 thousand hours in excavator equipment. The total emissions due to the use of product B are lower.

Product Carbon Footprint Reduction

- Q8Oils introduces their new Q8 Terra 2200 UTTO RC product.
- A unique product, developed by Q8Research, which uses high quality re-refined based base oils, giving an over 50 % lower PCF advantage over its predecessor, the Q8 T 2200, without making any compromises in quality.
- This sustainable version, Q8 Terra 2200 UTTO RC, is WB 101 approved using high quality base oils. This high VI of base oils gives good LTP (Low Temperature Performance) and more stable viscosities under different temperature loads.

Standard Q8 T 2200 versus the re-refined Q8 Terra 2200 UTTO RC

Consult our oil recommendation tool to find out which Q8Oils product is suitable for optimal performance of your vehicle.
