| SECTION 2: Hazards | dentification |
| 2.1 Classification of the sub | stance or mixture |
| Product definition | : Mixture |
| Classification according to ASPIRATION HAZARD | Regulation (EC) No. 1272/2008 [CLP/GHS]Category 1H304 |
| The product is classified as h | azardous according to Regulation (EC) 1272/2008 as amended. |
| Ingredients of unknown toxicity | : None. |
| Ingredients of unknown ecotoxicity | : None. |
| See Section 16 for the full tex | t of the H statements declared above. |
| See Section 11 for more deta | ailed information on health effects and symptoms. |
| 2.2 Label elements | |
| Hazard pictograms | : |
| | |
| Signal word | : Danger |

SECTION 2: Hazards identification

| Hazard statements | 1 | H304 - May be fatal if swallowed and enters airways. |
|---|----|--|
| Precautionary statements | | |
| Prevention | : | Not applicable. |
| Response | : | P301 + P310, P331 - IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting. |
| Storage | : | Not applicable. |
| Disposal | : | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Hazardous ingredients | : | Distillates (petroleum), hydrotreated light naphthenic Distillates (petroleum), hydrotreated light paraffinic Lubricating oils (petroleum), C20-50, hydrotreated neutral oil-based |
| Supplemental label elements | : | Not applicable. |
| Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles | : | Not applicable. |
| Special packaging requirem | er | <u>its</u> |
| Containers to be fitted with child-resistant fastenings | : | Not applicable. |
| Tactile warning of danger | : | Not applicable. |
| 2.3 Other hazards | | |
| Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII | : | This mixture does not contain any substances that are assessed to be a PBT or a vPvB. |
| Other hazards which do not result in classification | : | Prolonged or repeated contact may dry skin and cause irritation. |

SECTION 3: Composition/information on ingredients

| 3.2 Mixtures | : Mixture | | | | |
|--|---|------------------|-------------------|---|---------|
| Product/ingredient name | Identifiers | % | Classification | Specific Conc. Limits, M-factors and ATEs | Туре |
| ₱istillates (petroleum), hydrotreated light naphthenic | REACH #: 01-2119480375-34 EC: 265-156-6 CAS: 64742-53-6 Index: 649-466-00-2 | ≥90 | Asp. Tox. 1, H304 | - | [1] [2] |
| Distillates (petroleum), hydrotreated light paraffinic | REACH #: 01-2119487077-29 EC: 265-158-7 CAS: 64742-55-8 | ≥25 - ≤50 | Asp. Tox. 1, H304 | - | [1] [2] |
| Lubricating oils (petroleum), C20-50, hydrotreated neutral oil-based | REACH #: 01-2119474889-13 EC: 276-738-4 CAS: 72623-87-1 Index: 649-483-00-5 | ≥25 - ≤50 | Asp. Tox. 1, H304 | - | [1] [2] |
| Date of issue/Date of revision | :04-12-2024 Dat | e of previous is | sue : 07-06-2022 | Version : 1.0 |)5 2/15 |

SECTION 3: Composition/information on ingredients See Section 16 for the full text of the H statements declared above.

The mineral base oils contained in this product are severely refined and contain less than 3% DMSO extract according to IP 346 method, and are therefore not classified as carcinogen according to Regulation (EC) No 1272/2008, note L.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

| Eye contact | | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. |
|----------------------------|---|---|
| Inhalation | : | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : | Wash skin thoroughly with soap and water or use recognized skin cleanser. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | : | Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Protection of first-aiders | - | No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

4.2 Most important symptoms and effects, both acute and delayed

Over-exposure signs/symptoms Eye contact : No specific data. Inhalation : No specific data. Skin contact : Adverse symptoms may include the following: irritation dryness cracking Ingestion Adverse symptoms may include the following: ÷. nausea or vomiting 4.3 Indication of any immediate medical attention and special treatment needed Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. **Specific treatments** : No specific treatment. Date of issue/Date of revision :07-06-2022 :04-12-2024 Date of previous issue Version : 1.05 3/15

SECTION 5: Firefighting measures

| 5.1 Extinguishing media | | | | | |
|---|---|--|--|--|--|
| Suitable extinguishing media | Use dry chemical, CO_2 , alcohol-resistant foam or water spray (fog). | | | | |
| Unsuitable extinguishing media | Do not use water jet. | | | | |
| 5.2 Special hazards arising f | m the substance or mixture | | | | |
| Hazards from the substance or mixture | In a fire or if heated, a pressure increase will occur and the container may burst. | | | | |
| Hazardous combustion products | Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides | | | | |
| 5.3 Advice for firefighters | | | | | |
| Special protective actions for fire-fighters | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. | | | | |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. | | | | |

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. | | |
|---------------------------------|-----|---|--|--|
| For emergency responders | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". | | |
| 6.2 Environmental precautions | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). | | |
| 6.3 Methods and materials fo | r c | ontainment and cleaning up | | |
| Small spill | : | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. | | |
| Large spill | : | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Contain and collect spillage with not combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous ear and place in container for disposal according to local regulations. | | |
| 6.4 Reference to other sections | : | See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information. | | |
| Date of issue/Date of revision | | : 04-12-2024 Date of previous issue : 07-06-2022 Version : 1.05 4/15 | | |

SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling

| Protective measures | : Put on appropriate personal protective equipment (see Section 8). Do not swallow. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

7.3 Specific end use(s)

| Recommendations | : Not available. |
|--------------------------------------|------------------|
| Industrial sector specific solutions | : Not available. |

SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

8.1 Control parameters

Occupational exposure limits

| Product/ingredient name | Exposure limit values |
|---|---|
| Sistillates (petroleum), hydrotreated light | Limit values (Belgium, 5/2021) [Olie] |
| naphthenic | TWA 8 hours: 5 mg/m ³ . Form: mist. |
| | STEL 15 minutes: 10 mg/m ³ . Form: mist. |
| | EU OEL (Europe) |
| | TWA: 5 mg/m³ (oil Mist). |
| Distillates (petroleum), hydrotreated light | Limit values (Belgium, 5/2021) [Olie] |
| paraffinic | TWA 8 hours: 5 mg/m ³ . Form: mist. |
| | STEL 15 minutes: 10 mg/m ³ . Form: mist. |
| | EU OEL (Europe) |
| | TWA 8 hours: 5 mg/m ³ . |
| | STEL 15 minutes: 10 mg/m ³ . |
| Lubricating oils (petroleum), C20-50, | Limit values (Belgium, 5/2021) [Olie] |
| hydrotreated neutral oil-based | TWA 8 hours: 5 mg/m ³ . Form: mist. |
| | STEL 15 minutes: 10 mg/m ³ . Form: mist. |

Biological exposure indices

No exposure indices known.

SECTION 8: Exposure controls/personal protection

| Recommended monitoring procedures | : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance |

PNECs

No PNECs available.

8.2 Exposure controls
Appropriate engineering controls
Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Individual protection measures
Hygiene measures
Eye/face protection
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

SECTION 8: Exposure controls/personal protection

| Hand protection | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Wear suitable gloves tested to EN374. Recommended: < 1 hour (breakthrough time): nitrile rubber 0.17 mm. Provide employee with skin care programmes. |
|---------------------------------|--|
| Body protection | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Other skin protection | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: Boiling point > 65 °C: A1; Boiling point < 65 °C: AX1; Hot material: A1P2. Gas and combination filter cartridges should comply with the European standard EN14387. |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |

SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

9.1 Information on basic physical and chemical properties

| <u>Appearance</u> | |
|--|--|
| Physical state | : Liquid. [Oily liquid.] |
| Appearance | : <mark>Ø</mark> lear |
| Color | : 🗭 lorless to light yellow |
| Odor | : Slight |
| Odor threshold | : Not available. |
| Melting point/freezing point | : 尾45°C (<-49°F) [ASTM D 97] |
| Boiling point or initial boiling point and boiling range | : ▶240°C (>464°F) [ASTM D 2887] |
| Flammability | : Not applicable. |
| Lower and upper explosion limit | : Not available. |
| Flash point | : 🗭osed cup: >140°C (>284°F) [ASTM D 93] |
| Auto-ignition temperature | : ▶200°C (>392°F) |
| Decomposition temperature | : >280°C |
| рН | : Not applicable. |
| Viscosity | : |
| Solubility | |
| Media | Result |
| cold water | Not soluble |
| hot water | Not soluble |

SECTION 9: Physical and chemical properties

| Partition coefficient n-octanol/ water (log Pow) | : Not applicable. |
|---|-----------------------------------|
| Vapor pressure | : <0.0001 kPa (<0.00075006 mm Hg) |
| Density | : 🗭.87 g/cm³ [15°C (59°F)] |
| Relative vapor density | : >1 [Air = 1] |
| Explosive properties | : Not applicable. |
| Oxidizing properties | : Not applicable. |
| Particle characteristics | |
| Median particle size | : Not applicable. |
| 9 2 Other information | |

9.2 Other information 9.2.1 Information with regard to physical hazard classes

| 9.2.1 Information with regard | to physical nazard classes |
|--------------------------------|----------------------------|

12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

12.6 Endocrine disrupting properties

Not available.

12.7 Other adverse effects

No known significant effects or critical hazards.

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

Product Methods of disposal : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. **Hazardous waste** : Yes.

Packaging

SECTION 13: Disposal considerations

| Methods of disposal | : The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. |
|---------------------|---|
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |

SECTION 14: Transport information

| | ADR/RID | ADN | IMDG | IATA |
|------------------------------------|----------------|----------------|----------------|----------------|
| 14.1 UN number or ID number | Not regulated. | Not regulated. | Not regulated. | Not regulated. |
| 14.2 UN proper shipping name | - | - | - | - |
| 14.3 Transport hazard class(es) | - | - | - | - |
| 14.4 Packing group | - | - | - | - |
| 14.5 Environmental hazards | No. | No. | No. | No. |

14.6 Special precautions for user

: **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Maritime transport in : Not available. **bulk according to IMO instruments**

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture <u>EU Regulation (EC) No. 1907/2006 (REACH)</u>

Annex XIV - List of substances subject to authorization

Annex XIV

None of the components are listed.

Substances of very high concern

None of the components are listed.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

| Product/ingredient name | | % | Designation [Usage] | |
|---|----------------|------|---------------------|--|
| 8 Transformer Oil U | | ≥90 | 3 | |

| | RID = The Regulations concerning the International Carriage of Dangerous Goods |
| | by Rail |
| | SDS = Safety Data Sheet |
| | SVHC = Substances of Very High Concern |
| | STEL = Short Term Exposure Limit |
| | TLV = Threshold Limit Value |
| | TWA = Time Weighted Average |
| | UFI = Unique Formula Identifier |
| | UN = United Nations |
| | VOC = Volatile Organic Compound |
| | vPvB = Very Persistent and Very Bioaccumulative |
| | |

Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

| Classification | Justification |
|-------------------|--------------------|
| Asp. Tox. 1, H304 | Calculation method |

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 - Belgium

Q8 Transformer Oil U

SECTION 16: Other information

The mineral base oils contained in this product are severely refined and contain less than 3% DMSO extract according to IP 346 method, and are therefore not classified as carcinogen according to Regulation (EC) No 1272/2008. note L.

Note L: The classification as a carcinogen need not apply if it can be shown that the substance contains less than 3 % DMSO extract as measured by IP 346 "Determination of polycyclic aromatics in unused lubricating base oils and asphaltene free petroleum fractions - Dimethyl sulphoxide extraction refractive index method", Institute of Petroleum, London. This note applies only to certain complex oil-derived substances in Part 3.
