

Q8 Handel 68

Zinc-based hydraulic oil with very high viscosity index

Description

Q8 Handel 68 is an excellent zinc-based hydraulic oil that is suitable for a wide range of temperatures and applications. Thanks to its very high viscosity index of >180, the zinc-based oil has exceptional flow properties. The high oxidation stability assures an extended drain interval and lubricant life. Q8 Handel 68 is used in demanding applications that require very high viscosity index oils.

Applications

Q8 Handel 68 is used in all season applications, off-highway equipment. It is also applied in industries and applications requiring high viscosity index oils, such as in paper, steel, cement, mining industry.

Benefits

- Lower downtime and an improved maintenance efficiency
- · Zinc included technology
- Exceptionally high viscosity index
- Optimum air release
- · Outstandingly resistant to oil deterioration
- · Exceptionally suitable for use in all seasons
- Optimum separation of water
