

Q8 Antifreeze MPG Premixed

Superior engine coolant with minimal environmental impact

Description

Q8 Antifreeze MPG is a mono propylene glycol based engine coolant with exceptional corrosion inhibition. It is suitable for cooling systems of all types of internal combustion engines. Q8 Antifreeze MPG does not contain nitrite, amine, phosphate, borate and silicates. It is formulated to minimize environmental impact.

Applications

Q8 Antifreeze MPG is used in the cooling systems of off-road engines in environmentally delicate areas. It is also used in industrial cooling systems where food production is involved.

Specifications, recommendations and approvals

AFNOR	NF R 15-601	NATO	S-759
ASTM	D 3306	SAE	J 1034
JASO	M325		

Properties

	Method	Unit	Typical
Density, 20 °C	D 4052	g/ml	1,040
Colour	Visual	-	colourless
Freezing Protection 50-50%	D 1177	°C	-33,7
Equilibrium Reflux Boiling Point	D 1120	°C	105,9

The figures above are not a specification. They are typical figures obtained within production tolerances.

Remarks

Mixing Q8 Antifreeze MPG with other coolants might result in incompatibility problems. Check the manufacturers' recommendation if supplemental coolant additives might be added.
