

## **Q8 Chain Lube PTFE**

*Synthetic high adhesion spray for motorcycle chains*

### **Description**

Q8 Chain Lube PTFE is an excellent synthetic high adhesion spray lubricant for motorcycle chains containing PTFE. It provides a longer service life and has outstanding water resistance. Q8 Chain Lube PTFE prevents rust and corrosion and forms a durable lubrication film to protect against wear.

### **Applications**

Q8 Chain Lube PTFE is used for chains and linkages of on-road and off-road motor bikes as well as for karts and bicycles.

### **Benefits**

- Excellent adhesiveness to the chain.
- Outstanding prevention against flinging off the chain.
- Superb elastomer compatibility for use with o-ring type chains.
- Excellent protection against corrosion under all weather conditions.
- Excellent resistance to high temperatures and pressures.
